-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Allowable Subject Matter

1. The indicated allowability of claims 2 and 10, now incorporated into claims 1 and 9, respectively, is withdrawn in view of further consideration of reference(s) to Baker. Rejections based on the Baker reference(s) follow.

Drawings

2. The drawings were received on 15 July 2005. These drawings are approved.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1, 3, 6, 8-9, 11, and 14 are rejected under 35 U.S.C. 102(e) as being anticipated by Baker. Baker shows a spinner hubcap having a base plate 23 for attachment to an automobile wheel, and a shaft 20 having a central portion (namely 40 on shaft part 17) and an inner end 31 attached to the base plate 23, and an opposing outer end 41. The inner end 31 includes a threaded exterior surface. An outer plate 16 is retained on the outer end 41 of the shaft 20, and is free to rotate about the outer end 41 of the shaft 20 due to a bearing (35-37) attached to the outer plate 16 and disposed

Art Unit: 3617

about the central portion 40 of the shaft 20. The outer plate 16 acts as a hubcap shell, and rotates about the shaft 20 in response to wind and inertia after initial rotation of the wheel, at a speed of rotation independent of the wheel.

The exterior surface of the outer end 41 of the shaft 20 is smooth. A retainer plate 13 is mounted between the base plate 23 and the outer plate 16. As shown in Figure 1, the shape of the outer plate/hubcap shell 16 acts as a balancing weight that causes the outer plate/hubcap shell 16 to rotate at a different speed than the wheel.

Allowable Subject Matter

5. Claims 4-5, 7, 12-13, and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Good reference shows a rotating hubcap.
